

# Journal of Medical and Bioengineering

## CONTENTS

---

### Volume 6, Number 1, June 2017

- An Inertial Sensor Based System for Real-Time Biomechanical Analysis during Running..... 1  
*Xinyao Hu, Zhonghao Huang, Jianxin Jiang, and Xingda Qu*
- A Flexible Syndromic Surveillance and Outbreak Detection Feedback System.....6  
*Johnson Chao-Sheng Huang, Joseph Kwong-Leung Yu, and Yau-Hwang Kuo*
- STR/mtDNA Visualization Profiler Analysis Using Jmol ..... 11  
*Noor Maizura Mohamad Noor, Noraida Hj Ali, and Mohd Iqbal Hakim Harun*
- A Review of Pervasive Healthcare from Prevention to Emergency Rescue: Systems, Tools, Platforms and Techniques..... 17  
*Hanen Faiez and Jalel Akaichi*
- A New Automatic Method of Parkinson Disease Identification Using Complex-Valued Neural Network.....25  
*Rashidah Funke Olanrewaju and Nur Syarafina Zahari*
- Synthesis of a Bone Like Composite Material Dderived from Natural Pearl Oyster Shells for Potential Tissue Bioengineering Applications .....29  
*Ravi Krishna Brundavanam, Derek Fawcett, and G érrard Eddy Jai Poinern*
- The Comparison of Neurodegenerative Diseases and Healthy Subjects Using Discrete Wavelet Transform in Gait Dynamics .....35  
*Suleyman Bilgin*
